

CVS Health National Health Equity Advisory Board

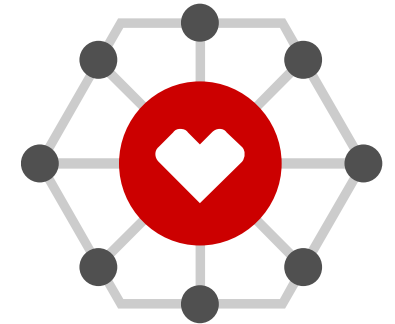

CVS Health's commitment to advance health equity

The CVS Health National Health Equity Advisory Board advises on strategies and best practices for advancing health equity.

The Board will advise on how ableism, classism, racism, sexism and discrimination impact the historically marginalized communities CVS Health serves. Board members will also provide feedback on policies, programs and practices that will help inform CVS Health's overall health equity strategy.

The board will focus on the following:

- provide recommendations on implementation of CVS Health's overall health equity strategy;
- advise on ways to improve data collection and use it to advance health equity;
- counsel on best strategies for addressing disparities related to heart health, mental health and women's health;
- identify opportunities to advance programs and policies to address identified disparities and gaps in care and services; and
- offer guidance in their specific areas of expertise to CVS Health leadership.
